

Company Overview

Creating Wealth Worth Having[®]

Company Overview

CCC HQ at More London Riverside Complex from Tower Bridge

Company Overview

Climate Change Capital (CCC) is an investment manager and advisor specialising in the opportunities created by the global transition to a low carbon economy. It advises and invests in companies that recognise combating global warming is both a necessity and an economic opportunity. Our activities aim to make the world's environment cleaner while delivering attractive financial returns.

Asset Management

Our Asset Management group develops and manages funds that invest in companies, projects and technologies to facilitate climate change mitigation or adaptation. This includes the world's largest private sector carbon emission reduction fund. CCC's investment objective is to use the firm's edge in the marketplace to generate attractive financial returns for our clients, investors and shareholders.

Advisory

Our Advisory team provides financial, strategic and policy advice to energy-intensive industries, financial institutions, clean technology companies and governments. The Advisory team's distinctive competence lies in its ability to blend a level of policy insight, generally not seen in the financial sector, with a level of financial insight not seen in the policy arena.

Policy ThinkTank

Since CCC was established we have shared our comprehensive knowledge of the low carbon sector to help policy makers develop the most effective and efficient policies for the rapid global transition to a low carbon economy.

Given the fundamental role of public policy in channelling significant amounts of capital into the solutions to climate change, it is critically important for policy makers to better understand finance and vice versa.

Through the policy advice and thought leadership activities of CCC, we attempt to bridge this divide and by so doing secure value for our funds and clients, as well as aid collective efforts to successfully tackle climate change.

Our Vision

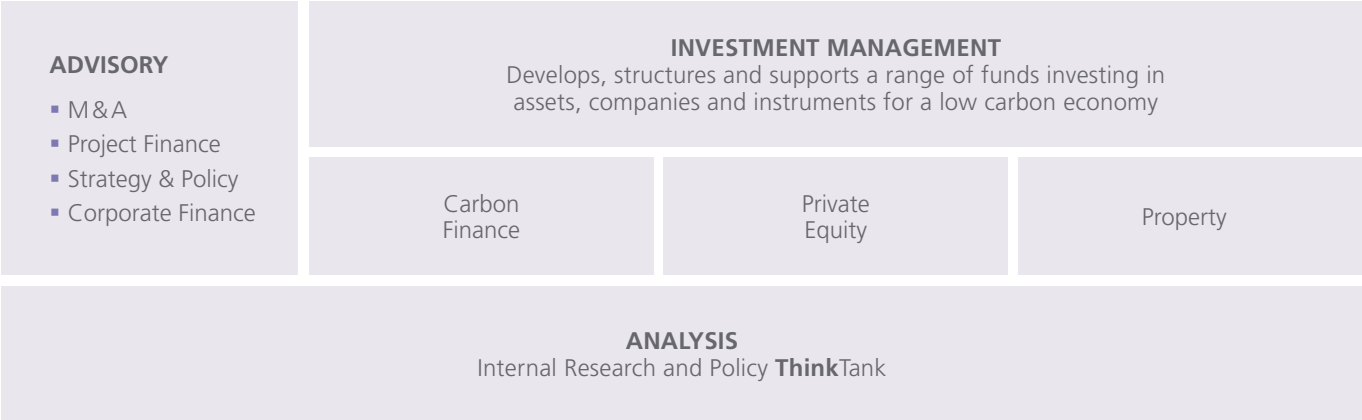

CCC is motivated by an ambition to channel significant amounts of capital into the solutions to climate change, while shaping the investment and policy environments so that the public good can be aligned with the private good of maximising returns to stakeholders. It's what we call Creating Wealth Worth Having[®]. CCC is involved in climate change mitigation and adaptation across a wide variety of asset classes, geographies and sectors. CCC is headquartered in London with a representative office in Beijing.

A Platform to Match a Global Opportunity

Climate Change Capital has established itself as a leading environmental investment manager and advisory group.

CCC is actively managing a wide variety of assets globally including energy efficiency, renewables, coal mine methane utilisation, landfill gas and gas distribution. We are looking to invest in clean technology businesses in Europe, create clean commercial buildings in the UK and develop and manage further funds across our product areas outlined below.

Our vision has created a particular working culture, made from the dedicated commitment of its staff to climate change issues, a blending of skills from the financial and the policy worlds, a spirit of collective entrepreneurialism and a shared desire to make a difference.
